

**ecoflex**  
**ECO-200**

The big brother to our patented, innovative ECO-100. All the proven technology with more capacity. The all-steel welded system is rugged enough for all types of jobs yet portable enough to fit into hard-to-reach areas. This wet/dry combo blaster features an integrated water pump, supports a wide variety of nozzles and is reliable, safe & easy to use.

- Pressure hold system with TeraValve media control feature
- Switch between wet & dry blasting on the fly
- Can fit on scaffolding, scissor lifts, wherever you need it!
- Integrated water pump with siphon & garden hose functionality
- Great for large commercial and industrial projects
