

PROJECT:

Classic Service Station
Smitty's Coatings & Blasting

OBJECTIVE:

Remove old paint, clean oil, residue and pollution from brick, wood & other materials to refresh the surface of a historic service station.

ESCA SUPPLIED EQUIPMENT:

- Walnut Shell Abrasive Media 18/40 grit
- Nozzles
- Hoses
- Personal Protective Equipment (PPE)

RESULTS:

Blasting Pressure: Various settings were applied based on the substrates involved to ensure optimal cleaning without damage.

CONCLUSION:

The project successfully restored the service station to its historic condition. The walnut shell media effectively removed old paint and contaminants, enhancing the building's appearance while preserving its structural integrity.

The use of ESCA's equipment and media provided an efficient and eco-friendly solution, meeting the project's goals and exceeding expectations.
